# How does HERMES PDG act as a passenger data single window for governments?

HERMES Passenger Data Gateway (PDG), a trusted, secure, and cost-effective solution for the submission, validation, and redistribution of passenger data.

BENEFITS

- Full control and ownership of data and connections.
- Integrates data from all border crossings. Incl. land borders.
- No cost per message to either government or the airline.
- Ensured passenger data confidentiality and integrity.
- Secure data exchange over the public internet without message size restrictions.
- On-premises or in a cloud-based infrastructure.
